

Technical Management Group

Corporate Capability Statement

About Us

Since 1997, TMG has been focused on strategic project planning, engineering oversight, project execution and Owner's Team project management support.

Our Vision

Being passionate about providing tailored services for mining projects through collaborative goal-oriented teams, to deliver value-add opportunities and innovation, in partnership with our clients to meet their needs.

Services Overview

Project Reviews & Assessment

Strategic Project Planning for portfolio management, project prioritization, development synergies and sequencing.

Execution Planning through the development of comprehensive Project Execution Plans including schedules, budgets, and packaging strategies to ensure corporate and site-teams are aligned.

Comprehensive Scopes & Budget Reviews to ensure that the defined scope and budget are inclusive of all project requirements and fall within reasonable expectations.

Project Risk Evaluations through facilitated meetings and analysis processes to ensure regular formal risk mitigations processes are put in place for key project threats.

Site Visits to assess project progress and facilitate communication with the site projects and operations teams and ensure alignment on the overall project execution.

Project Audits at each Stage Gate to ensure key performance metrics and investment criteria are on target, check validity of engineering inputs, and confirm that corporate needs match with the project scope.

Meeting Facilitation for formal project design reviews or planning sessions.

Project Execution Support
